

PROFESSIONAL EXPERIENCE

Digital Assets and Corporate Strategy Initiatives, Broadridge (March 2025 – Present)

- Partnered directly with the Head of Strategy and Business Development for BBD to develop industry and market structure models for how tokenization impacts brokers, DTCC, and issuers, including three future-state operating models and a platform-level tokenization integration for BTCS infrastructure.
- Built and delivered an executive presentation to BBD leadership, including the President of BBD, outlining Broadridge's strategic options for on-chain corporate actions and communications.
- Coordinated with EY on Broadridge's Corporate Actions Tokenization Workshop, developing the industry research, opportunity framing, and executive materials used in strategy discussions.
- Authored two formal white papers for senior leadership: *Corporate Actions on Chain for the Innovation Lab* and *Yield Advantage of Tokenized Real World Assets for the SVP of Digital Strategy*
- Worked with the VP of Innovation on strategic partnership evaluation with Chainlink, LayerZero, and Avalanche, supporting ecosystem mapping, use case prioritization, and partner positioning.
- Participated in strategic steering committee meetings on tokenization, AI, and digital asset impact on core businesses, including preparation of materials and follow-up analysis for C-suite leadership.
- Designed and built a Digital Transfer Agent prototype using Figma and V0.dev, demonstrating how tokenized issuance, ownership, and corporate actions could function in a next-generation platform.

Business Development Specialist, Broadridge (March 2025 - Present)

- Support go to market execution and market research for Broadridge's digital asset and capital markets platforms across banks, brokers, and institutional asset managers
- Advance revenue generation across product suites by identifying, qualifying, and progressing opportunities with institutional clients in partnership with sales teams.

Management Training Program, Broadridge (June 2024 – March 2025)

- Developed financial forecasts, ROI models, and operational performance dashboards using Excel and PowerBI.
- Designed and delivered a business case that was implemented, creating an automated PowerBI and Power Automate early-warning system tied to client contract penalty thresholds to proactively reduce financial risk from production incidents.
- Worked directly with ICS cost structures, penalty clauses, and contract terms to quantify financial exposure and design risk mitigation workflows.

ADDITIONAL EXPERIENCE

Legislative Intern, Senate Majority Leader Chuck Schumer (January 2022-May 2022)

- Conducted policy research and briefing materials for senior staff on financial services, technology, and regulatory topics.
- Managed constituent communications and stakeholder outreach, supporting event coordination, issue tracking, and executive communications.

EDUCATION

Stony Brook University, NY (2019 – 2023)

B.S. Business Management (Marketing Specialization)

B.A. in Psychology

- Business Honors Program, summa cum laude: GPA: 3.89
